#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1754

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17, 32 and 33 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Khare et al '117, for the reasons of record. Applicants' argument, that reducing a composition with a suitable reducing agent under suitable conditions that takes place after the composition has been calcined is a patentable improvement over Khare et al '117, is not convincing, since applicants' claims do not require a step of reducing the composition with a reducing agent. No distinction is seen between elemental metal which has been formed by reducing a metal oxide, and elemental metal which has been formed by a method other than the reduction of metal oxide. Applicants' argument, that it would not have been obvious to one of ordinary skill in the art to reduce the composition of Khare et al '117 because then the composition would no longer contain a metal oxide, is not convincing, since applicants' claims do not require that all of the promoted particulate be reduced to the zero-valence state. Applicants' argument, that the instant application claims a sorbent composition which has undergone a reduction step, is not convincing,

Art Unit: 1754

since there is no evidence on record showing that a sorbent having been reduced under reducing conditions would be any different from the sorbent of Khare et al '117.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wayne Langel whose telephone number is 571-272-1353. The examiner can normally be reached on Monday through Friday, 8 am - 3:30 pm Eastern Time.
